

M2.17 – Ongoing module development supporting prioritised features requested by users through WP3

Significant work has been carried out to support new Scratchpad 2.0 users, and also to migrate Scratchpad 1.0 users to the new system. We have continued to receive feature requests via our Issues system¹, the vast majority of which we have worked into the Scratchpads 2.0 code and subsequently released. The following table gives a description of the issues that have been fixed, along with a link to their page on our issue tracker.
